**Project Title:** Fellowship in Paediatric Ophthalmology and Strabismus

**Background:** Until 2015 there was no fellowship in paediatric ophthalmology and strabismus in Sweden. The increasing shortage of paediatric ophthalmologists and strabismus surgeons in Sweden led to the first fellowship in 2015, offered at St. Erik Eye Hospital in Stockholm. A second fellowship is ongoing during 2016.

**Project:** The author is main supervisor for the paediatric fellows at St. Erik Eye Hospital. The project aims at creating and optimizing a curriculum and establishing a foundation for the fellows to continue to work as paediatric ophthalmologists and strabismus surgeons. The curriculum is based partly on other curricula, partly on trial-and-error and partly on feedback from the fellows.
