## **Project Abstract**

***Title of Project:*** *Enhancing Ophthalmology Residency Training in Switzerland: An Inclusive Analysis and Improvement Project*

**Purpose:** Swiss Residency Training for ophthalmologists is officially defined by the length of training and knowledge to be acquired but the on-the-job training itself can vary a lot throughout the different hospitals and training centers as well as in one's curriculum. The purpose of the project is to visualize the differences in the trainings and to elevate the end-of-residency knowledge.

**Methods:** Analyzing the actual situation with surveys and published data. Publishing and informing about the results of the surveys to provide an impulse to adapt the training to the desideratum. Organize and provide special training sessions to the residents.

**Results:** as it is an ongoing project no results are available at the moment.

**Conclusion:** as it is an ongoing project no conclusion is available at the moment.
