Project Abstract

Title of Project: Establishing a psychological care in Department of ophthalmology at University Hospital center Zagreb

Purpose: To provide psychological support, psychological education and acute crisis management in ophthalmological patients.

Methods: Psychological help will be provided for
Patients with eye malignancies
Children and their parents who are admitted to hospital
Patients with chronic eye diseases for improving compliance and adherence of treatment
Patients who lost their eyesight due to trauma or acute eye incident
Patients with genetic diseases who are going to lose their vision

Results: Questionnaire will be conducted in order to determine helpfulness of treatment.

Conclusion: The conclusion will be presented after completion.
