## **Project Abstract**

***Title of Project: Corneal topography in children with retinopathy of prematurity***

**Purpose:** To evaluate corneal alterations in children with retinopathy of prematurity (ROP), regardless of treatment history.

**Methods:** The project will be conducted between 2024 and 2025 in the Department of Ophthalmology, University of Zielona Gora, Poland. Children older than 6 years with a history of ROP will be enrolled in this study. Age- and gender-matched healthy volunteers will serve as controls. Corneal topography will be obtained with Anterior (Heidelberg Engineering, Heidelberg, Germany).

**Results:** Not available yet.

**Conclusion:** Not available yet.
